

Keep your eyes healthy with VSP's Primary EyeCare benefit.

Your Primary EyeCare benefit provides medical and urgent care that goes beyond your regular VSP® Vision Care benefits:

- Treatment for eye pain or conditions like pink eye
- Tests to diagnose sudden vision changes
- Pictures of your eyes to detect medical conditions like glaucoma and identify abrasions, growths, or other eye abnormalities
- Exams to monitor cataracts

You can visit your VSP doctor as often as needed, for a small copay. Plus, you don't need a referral. And if your doctor finds that you need to see a specialist, they'll consult and coordinate with your primary care physician.

With VSP, you get personalized eyecare from a doctor you can trust. Your VSP doctor takes the time to get to know you and your eyes, keeping you healthy year after year.

It's easy to use your Primary EyeCare benefit.

- **Find the right VSP doctor for you.** You'll find plenty to choose from at vsp.com or by calling [800.877.7195](tel:800.877.7195).
- **Already have a VSP doctor?** Make an appointment and tell them you have VSP.

That's it! Your VSP doctor will handle the rest.
